

# CANEBRAKE COUNTY WATER DISTRICT

## DISTRICT BACKGROUND

The Canebrake County Water District (CWD) provides potable water service within a small high-desert community south of the unincorporated east county community of Julian.

The District was formed in 1966 to provide water service within approximately 960 acres that are developed primarily with seasonal residences; there are few permanent residents within District. The District pumps and distributes local groundwater to 82 metered connections.

The Canebrake County WD owns one well and two reservoir storage tanks with a combined capacity of approximately 67,000 gallons. The water system is maintained by district staff.

LAFCO approved a sphere-of-influence for the Canebrake County

Water District in 1984 that is coterminous with the district boundary.

## DISTRICT CHARACTERISTICS

<b>Principal Act:</b>	Water Code § 30000 et seq.
