

# PAUMA VALLEY COMMUNITY SERVICES DISTRICT

## DISTRICT BACKGROUND

The Pauma Valley Community Services District (CSD) provides wastewater and security services within the unincorporated north county community of Pauma Valley.

The District, which includes approximately 1,445 acres, provides services to 314 homes, a golf center, school, small commercial area, and limited numbers of agricultural users. Approximately half of the territory within the CSD is undeveloped.

The Pauma Valley CSD was formed in 1961 to collect, treat, and dispose of locally generated wastewater. The District operates a wastewater treatment plant with a capacity of 150,000 gallons per day (gpd). An average flow of 75,000 gpd of treated effluent is percolated through district infiltration ponds.

In 1996, the Pauma Valley CSD was authorized to provide security services as a latent power; activation of the latent power was subsequently confirmed by CSD voters. Security services involve guard and patrol services, alarm system monitoring, and vehicle traffic control. Security services are funded exclusively through monthly service charges.

LAFCO approved a sphere-of-influence for the Pauma Valley CSD in 1986 that is larger than the district boundary. The sphere was last affirmed in 2013.
